

PRODUCT HIGHLIGHT

UV Color, a high tech color printer, needed to expand into additional production and office space a block down the street to the west of their Corporate Headquarters in Roseville, Minnesota.

The problem was how to connect that workgroup's PC's as well as an HP9000 system utilized to track production runs there.

To try to run the traffic over a T-1 was just not feasible due to bandwidth requirements. And adding a DS3 was just too costly.

UV COLOR

The added office and production location provided a clear 265-meter line-of-sight view across the street and down the block for the link.

Bob Kjelden, UV Color COO, stated, "The Laser Link is a great alternative to the typical 'hurry-up-and-wait' for

In addition to data, UV Color plans to also route video from the security system cameras across the link, and may route voice in the future as well.

The TS-702 10 Mbps link was installed for UV Color within two weeks of order placement, and has delivered a solid full 10 Mbps of throughput since it was turned up.

Location: 2430 Prior Avenue North, Roseville, Minnesota
Company: UV Color
Protocol: Ethernet
